Subject: small business study

Hello;
I am writing in regard to owning intellectual property with the United States.
I own: LEAPING LIZARD 2/587,477
WALK LIGHTLY 3/203,316
GREEN-NECK 2/585,381
DR. SCIENCE MOUSE : serial 7/925,653

My concern is with Jobbery.. I am trying to avoid any litigation with my trademarks, but find it very difficult to work them properly with government workers trying to steal my identity and getting paid by the government to do so.. Such is the case of a neighbor who works for the census. She has for a long time been the biggest drug dealer in this area and now works for the DEA. She has brought all of her drug related friends onto the payroll to stalk me. I am constantly broken into with work related items stolen. I am stalked everywhere I go and my computer is always being hacked. I send out mail to pick up business accounts and it never arrives. So if I was to end up in a litigation case, first of all I can never make any money because of all the stalking and second they will say I am not working my trademarks, which i barely can because of all the corruption.. The road I live on had almost everyone on the payroll with stimulus money, Homeland Security ICE program. This money was supposed to be used to inform on illegal aliens but instead all of them got together in a gang to try to steal my trademarks. It does not help that my property has gold on it , so these government crooks not only want my trademarks but also my physical property. If there is anyone that can help me with this situation, I would appreciate it. I revoked my attorney of record because he was involved also.I currently am trying to license or sell my trademarks and property to start new someplace else. I

will gladly turn all these people in to the proper authorities, local law enforcement will not help because they are part of the gang also. Its a strange thing what gold does to people. My number is (b)(6) [redacted]. You might talk to someone other than me because they intercept my calls and have purchased a software program that imitates voices. It is such a mess, but now you have on record what I am going through in case I end up in litigation to protect my trademarks. Thank You for this opportunity.
